THE

PREFACE

TO

The Reader;

Shewing the Neceſſity, Subſtance, and Method of this Work.

HANGE, the common Fate of Sublunary things, is of all others That of living Languages, which ſometimes are in a flouriſhing, and ſometimes in a declining condition, there being always a ſenſible Alteration, which, as it is better or worſe, doth either commend or diſcommend it to the World. As to the French, 'tis not very long ſince it was in a decaying condition, and wanted ſomething to purge it from thoſe ill humours it had contracted a great while. Therefore it was provided by Cardinal *Richelieu*, That an Academy of acute and judicious perſons ſhould be ſet up to correct and improve it. And accordingly there was an exact Inquiry made into ſuch expreſſions as wanted amendments. Some improper Words they put out, and introduced others in their ſtead. They changed many Phraſes, and fitted them better to the purpoſe and meaning of the matter. The French Orthography, formerly ſtuffed with ſo many ſuperfluous letters, they brought as near the Pronunciation as could in reaſon be allowed. They look upon Tranſpoſitions and Parentheſes in a continued Diſcourſe as a ſtumbling block to the Reader, and made it their buſineſs to bring the French Tongue into the plaineſt Method. In a word, they have ſo judiciouſly corrected, refined, and improved it, that it is now become the darling Language of Europe. So ſweet it is and pleaſing to the ear, ſo very neat and curious in its expreſſions, ſo eloquent in its own genius and nature. Thus being brought to perfection by the ſaid Academy, it is now left to their care to preſerve it in its purity, and for the future to oppoſe the former rambling way and extravagant courſe of exploding, changing, intruding Words and Phraſes. By all which contrivance and care it is now come to paſs, that the French Tongue is in a manner grown Univerſal in Europe, but eſpecially amongſt the Gentile part of it. And of all Parts of Europe next to France, none is more fond of it than England, whoſe Language is ſo much made up of the French, that (according to Mr. *Howell* in his Epiſtle upon *Cotgrave*) an Engliſh-man had need to ſtudy French to ſpeak

good

good Engliſh. So that it is no wonder why the French Tongue ſhould be ſo kindly received here among all Sorts of people.

To which I confeſs Mr. *Cotgraves* Dictionary would have contributed a great deal more than it has, had it been any ways accommodated to our preſent Age. Which indeed is highly pretended to in the laſt Edition thereof, but ſo performed that the Title runs away with all the Credit of it. And indeed the Book is ſo far from being refined according to Cardinall *Richelieu's* Academy, as is pretended in the Title, that it ſwarms every where with Rank Words and Obſolete Phraſes, ſavouring more of King *Pharamonds* Reign than that of *Lewis* XIV. So that I look upon *Cotgrave* as a good Help indeed for reading of old French Books (a thing which few people mind) but very inſignificant either for reading of new ones, or ſpeaking the Court-French, which is the Deſign of this Work.

Therefore I have indeavoured to do it as near as I could according to the preſent Uſe and modern Orthography. And, that you may know before hand how the ſame is performed, I ſhall make in ſhort a previous Reflexion, firſt upon Words, and then upon Phraſes, and Proverbs, and ſo proceed to the Method of this Book. There are two ſorts of *Words*, Words in uſe, and Words not in uſe. The firſt are either Common, or High Words, or Terms of Art. Common Words are uſed by all people in generall that ſpeak the ſame Language, High (or Choice) Words are moſt proper to Schollars and beſt educated perſons, and Terms of Art are peculiar to thoſe that profeſs or ſpeak of any Art. The firſt two being the moſt current part of a Language, I have taken the more care not to omit any of them either in my French or Engliſh, and particularly, to take notice of thoſe that are lately come to Uſe. And, as for Terms of Art, but eſpecially Law-Terms, you will find here as great a Supply of them as can in reaſon be expected in ſuch a Volume. Words not in Uſe are either Obſolete, or New-forced Words. Of the firſt ſort ſome are ſo obliterated, worn out, and decayed, that they may very well be called the Rubbiſh of any Language. So that, both for neatneſs and brevity ſake, I have willingly and freely omitted them. Wherein I imitate ſuch as raiſe up a Building from its Ruins. They remove all the Rubbiſh, and lay aſide whatever they find cumberſom and unſerviceable. And what are thoſe Antiquated and Cramp't Words which make up a great part of *Cotgrave*, Words that offend the eyes and grate the ears, but the Rubbiſh of the French Tongue? 'Tis true that ſome obſolete Words are not ſo much out of date, but that they will paſs ſometimes; and, though not approved of by the generality, may be found nevertheleſs amongſt ſome of our late Authors. Theſe indeed, together with ſome New-coyned Words that in all probability will hardly come to Uſe, I have admitted here; but with a prefixed mark, to diſtinguiſh them thereby from current Words. But, becauſe it is not enough for a compleat Dictionary to give an account of Words, unleſs one ſhews withall the uſe of them; therefore I have inriched this with great plenty of *Phraſes*, according to the various acceptations of Words. So that there are few Property's of the French or Engliſh Tongue but you will find here, a Thing of great uſe both for the ſpeaking and the reading part. Beſides that, to ſeaſon the naturall dulneſs of the Work, I have interwoven ſo many curious Deſcriptions and Obſervations, and inſerted ſo many *Proverbs* both for diverſion and uſe, that the Reading of it will be no leſs pleaſing than uſefull. And, becauſe Engliſh Proverbs may probably take well both amongſt Engliſh and Foreiners, therefore I was the more free of them in my ſecond Part. Where you may meet here and there a parcell of too ſevere ones againſt the female Sex, which I was my ſelf not a little ſurprized at. For, though there be much of that humour in Outlandiſh Proverbs, yet I wondered to ſee them all outdone by a Nation where the Sex is ſo kindly uſed. Next to Proverbs, I am to give an account of my *Method*, whereby Derivatives are reduced to their Primitives. So that the Primitive go's as a Leading Word in Capitals, and its Derivatives that come after in ſmaller Characters. By which means one hath a curious and diſtinct Proſpect of every Primitive, with all its Off-ſpring together. Which is certainly

ly a great Conveniency, and muſt needs be a ſingular Help to the Learner, who finding by this means the Etymology of Words lying all along before him will eaſily maſter the Language. But, that nothing might be wanting on the other ſide, I have taken care however to put in the Derivatives in their Alphabeticall Order, where they have a Star before them that leads you to the Primitive, which is to be found moſt times in the ſame page.

The greateſt Help I have had for this Piece of Work, as to the French part of it, is *Father Pomeys* Dictionary Royall French and Latin, the neweſt and the beſt that is now extant in that way. But, as it is uſuall in Things improvable of this kind, I have altered, added, and retrenched a great deal. And, as I differ from him beſides in my Method, ſo I was reſolved not to imitate him (as one might) by way of revenge in that ingentile Character he gives of Proteſtants, under the words *Calviniſte*, *Huguenot*, &c. For, beſides that a Dictionary is a moſt improper Book to make Declamations in, I thought it very unworthy of Chriſtians to be ever barking at one another. But *F. Pomey*, though otherwiſe a man of good parts, is of another temper; and cannot ſo much as name a *Calviniſt*, or a *Huguenot*, but he muſt preſently fly out, ſcold at him, and call him by the name of *Hæreticus*, *Impius*, *Sacrilegus*, as if either Wit or good Manners could find no better Latin to deſcribe a Proteſtant.

I Conclude with a Requeſt in the Printers behalf and my own, That the Reader would be ſo courteous as to connive at ſome Overſights of ours that he may meet withall here and there in the peruſing of this Book. It is but common Civility ſo to do, and there is but Reaſon enough, conſidering how hard it is either to compoſe or to print a Book without faults.

Imprimatur,
